EDUCATION

The Ohio State University, Columbus OH
B.S. Data Analytics, May 2026

Overall GPA: 3.57/4.00
Dean's List (AU22-SP26)

Coursework: Statistical models for Data Analysis and Discovery in big-data settings, Data Mining, Predictive Analysis, Bayesian Analysis, Data Structures & Algorithms, Data Science, Artificial Intelligence

SKILLS

Programming: Python, R, SQL, Java, C

Libraries Used: pandas, NumPy, scikit-learn, matplotlib

Visualization: Tableau, Excel

Tools/Technologies: HTML/CSS, Git/GitHub, Latex, Gurobi

WORK EXPERIENCE

Union of Vietnamese Student Association ([UVSA-Midwest](#))

Columbus, OH

Analytics Chair | Nonprofit (501(c)(3))

April 2025 – May 2026

- Processed and fulfilled cross-committee data requests through data extraction, reporting, and dashboard creation
- Monitored Cabinet members' performance, ensuring accountability through evaluation/feedback

OSU Research Cycle Program

Columbus, OH

Researcher | *Modeling Diffusion with Random Walks: Mesh Parameterization* *August 2025 – May 2026*

- Researched diffusion modeling and geometry processing using random walk-based methods and Laplacian techniques for harmonic mesh parameterization

PROJECTS

IGS Energy – Battery Optimization (Capstone) | R, Python, Tableau

Columbus, OH

- Developed a time-series regression model based off energy consumption data to optimize battery usage efficiency given energy constraints, resulting in projected customer savings of upwards of \$1700+ a year

COTA Bus Stop Optimization [Project](#) | Python, Gurobi

- Formulated a Maximum Coverage Location Problem (MCLP) using Python and Gurobi to optimize bus stop placement across Columbus, integrating U.S. Census and COTA transit data to help approximately 43,000 residents under infrastructure constraints

Stock Market Analysis & Research [Report](#) | R, Latex

- Given prior stock market data, built a Bayesian inference model to report and determine which companies and sectors will have a positive return

EXTRACURRICULAR ACTIVITIES

Chinese Lion Dance Leader

August 2024 – May 2026

- Led and coordinated weekly practices, performance choreography, and mentored 6+ team members

Big Data & Analytics Club

August 2023 – May 2026

- Discuss and learn more about the state of the art and future capabilities that Data Analytics can offer from several sources thru workshops, speakers, hackathons, and more
