EDUCATION

The Ohio State University

Columbus, OH

B.S. Data Analytics | GPA: 3.57/4.00 | Dean's List (AU22–SP26)

May 2026

Relevant Coursework: Statistical Models for Big Data, Data Mining, Predictive Analysis, Bayesian Analysis, Data Structures & Algorithms, Artificial Intelligence

TECHNICAL SKILLS

Languages: Python, R, SQL, Java, C

ML & Statistics: scikit-learn, Bayesian inference, regression modeling, time-series analysis, optimization (Gurobi)

Libraries: pandas, NumPy, matplotlib, (actively learning: TensorFlow / PyTorch)

Other: Git/GitHub, LaTeX, HTML/CSS, Tableau, feature engineering, experimental design

WORK EXPERIENCE

Analytics Chair | Union of Vietnamese Student Association (UVSA-Midwest) · Nonprofit

Apr 2025 – May 2026

- Designed and implemented data pipelines to extract, clean, and consolidate cross-committee datasets, enabling reproducible reporting and trend analysis
- Applied statistical methods to evaluate Cabinet member performance metrics, identifying trends and surfacing actionable insights for organizational decision-making
- Automated recurring reporting workflows, reducing manual effort and improving consistency of data outputs across 5+ teams

Undergraduate Researcher | OSU Research Cycle Program · Diffusion Modeling & Mesh

Parameterization

Aug 2025 – May 2026

- Investigated diffusion modeling via random walk methods and Laplacian techniques for harmonic mesh parameterization — applying probability theory and spectral graph analysis
- Formulated and tested mathematical models to characterize diffusion behavior, contributing to a research report on geometry processing methods
- Developed research intuition in stochastic processes, graph-based methods, and iterative mathematical modeling — foundational to modern ML research

PROJECTS

IGS Energy – Battery Optimization (Capstone) | R, Python, Tableau

- Developed a time-series regression model on real-world energy consumption data, implementing feature selection, cross-validation, and residual diagnostics
- Optimized model hyperparameters to maximize predictive accuracy, yielding projected customer savings of \$1,700+/year — demonstrating applied supervised learning in a business context
- Communicated model uncertainty and confidence intervals to non-technical stakeholders through data visualizations and executive summaries

COTA Bus Stop Optimization | Python, Gurobi

- Formulated a Maximum Coverage Location Problem (MCLP) — an integer programming optimization model — integrating U.S. Census and COTA transit data
- Designed objective functions and constraints to maximize population coverage under infrastructure limitations, extending coverage to ~43,000 residents
- Demonstrated ability to translate real-world constraints into mathematical models, a core data science skill for operations and logistics ML

Stock Market Analysis & Research Report | R, LaTeX

- Constructed a full Bayesian inference pipeline: prior specification, likelihood estimation, posterior sampling, and credible interval reporting on sector-level return probabilities
- Performed probabilistic model comparison across industry sectors, producing a structured research report suitable for investment decision support

- Applied Markov Chain Monte Carlo (MCMC) concepts and statistical inference to draw conclusions from historical market data under uncertainty

End-to-End ML Classification Pipeline [TARGET PROJECT] | *Python, scikit-learn, pandas*

- (In progress) Building a supervised ML pipeline: EDA → feature engineering → model training (logistic regression, random forest, XGBoost) → evaluation (ROC-AUC, F1) → documented findings on GitHub

EXTRACURRICULAR ACTIVITIES

Big Data & Analytics Club | The Ohio State University

Aug 2023 – May 2026

- Participated in hackathons, ML workshops, and speaker series covering state-of-the-art methods in data science, NLP, and predictive analytics

Lion Dance Leader | The Ohio State University

Aug 2024 – May 2026

- Led and coordinated 6+ team members through weekly practices and performances — building communication, mentorship, and organizational skills
