

Tony Tran

Columbus, OH | tran.967@osu.edu | (220) 212 – 9725 | [linkedin.com/in/tonytran967](https://www.linkedin.com/in/tonytran967)

EDUCATION

The Ohio State University, Columbus OH

B.S. Data Analytics, May 2026

Overall GPA (4.0 scale): 3.57

Honors: Dean's List (AU22-SP26)

Coursework: Statistical models for Data Analysis and Discovery in big-data settings, Data Mining, Predictive Analysis, Bayesian Analysis, Data Structures & Algorithms, Data Science, Artificial Intelligence

SKILLS

Software: R, Tableau, SQL, Java, Python, C, HTML/CSS, Excel, Latex, Squarespace

Certifications: CompTIA IT Fundamentals (ITF+), Microsoft Excel, Word, PowerPoint, Outlook

WORK EXPERIENCE

Union of Vietnamese Student Association ([UVSA-Midwest](#))

Columbus, OH

Analytics Chair | Nonprofit (501(c)(3))

April 2025 – May 2026

- Led and facilitated Chair and Cabinet meetings by setting agendas and guiding discussions
- Monitored Cabinet members' performance, ensuring accountability through evaluation/feedback
- Fulfilled cross-committee data requests through data extraction, analysis, and reporting.

OSU Research Cycle Program

Columbus, OH

Data Analyst | *Reaction-Diffusion Systems & Metabolic Modeling*

August 2025 – May 2026

- Conducted pattern recognition and statistical analysis to draw insights from simulated and real-world data on plant development
- Performed statistical modeling and data analysis on microbial metabolism datasets

PROJECTS

IGS Energy – Battery Optimization (Capstone) | R, Python, Tableau

Columbus, OH

- Applied machine learning-driven optimization strategies to determine optimal battery usage
- Utilized data science techniques to support sustainable energy usage and reduce household carbon footprints

COTA Bus Stop Optimization [Project](#) | Python, Gurobi

- Using public available data from COTA and Ohio's Census, used a MCLP model to determine optimal spots for future bus stops to be implemented based off of demand and availability.

NYC Airport Delay Analysis | SQL, R, Python, Tableau

- Analyzed flight delay data for NYC-area airports to identify key factors in departure and arrival delays

Stock Market Analysis & Research [Report](#) | R, Latex

- Given prior stock market data, built a predictive Bayesian model to report and determine which companies and sectors will have a positive return

EXTRACURRICULAR ACTIVITIES

Chinese Lion Dance Leader

August 2024 – May 2026

- Led and coordinated weekly practices, performance choreography, and mentored 6+ team members

Big Data & Analytics Club

August 2023 – May 2026

- Discuss and learn more about the state of the art and future capabilities that Data Analytics can offer from several sources thru workshops, speakers, hackathons, and more
