## EDUCATION

---

### The Ohio State University

B.S. Data Analytics | GPA: 3.57/4.00 | Dean's List (AU22–SP26)

Columbus, OH

May 2026

## TECHNICAL SKILLS

---

**Languages:** Python, R, SQL

**Libraries & Tools:** pandas, NumPy, scikit-learn, matplotlib, seaborn, Gurobi

**Visualization & BI:** Tableau, Excel, Power BI (familiar)

**Other:** Git/GitHub, DuckDB, DBeaver, HTML/CSS, ETL pipelines, Dashboard development, A/B testing

## WORK EXPERIENCE

---

### Analytics Chair | Union of Vietnamese Student Association (UVSA-Midwest) · Nonprofit

*Apr 2025 – May 2026*

- Owned end-to-end data workflows across 5+ committees to extract, clean, and report on ad-hoc requests while building and maintaining interactive Tableau dashboards tracking Cabinet KPIs
- Translated ambiguous business questions into defined reporting requirements and actionable insights for non-technical stakeholders

### Undergraduate Researcher | OSU Research Cycle Program · Modeling Diffusion with Random Walks

*Aug 2025 – May 2026*

- Applied mathematical modeling and algorithmic analysis to study diffusion processes, communicating complex quantitative findings through structured technical reports reviewed by faculty advisors

## PROJECTS

---

### Superstore Sales Performance [Dashboard](#) | SQL (DuckDB), Python, Tableau

- Wrote 7 business-driven SQL queries in DuckDB/DBeaver to identify \$17,725 in annual losses from Tables sub-category (-8.56% margin) driven by a 26% average discount rate
- Built end-to-end pipeline from raw CSV through Python (pandas, seaborn) to a published Tableau Public dashboard with KPI cards, regional map, and interactive filters
- Uncovered margin compression in 2017 despite 51% revenue growth over 4 years, attributing root cause to Furniture discounting and Central region pricing gaps

### IGS Energy - Battery Optimization (Capstone) | R, Python, Tableau

- Designed and validated a time-series regression model on energy consumption data to optimize battery usage, projecting customer savings of \$1,700+/year
- Delivered executive-facing Tableau dashboards summarizing model outputs, trends, and business recommendations to non-technical stakeholders

### COTA Bus Stop Optimization | Python, Gurobi

- Formulated a Maximum Coverage Location Problem (MCLP) integrating U.S. Census and COTA transit data, improving estimated coverage for ~43,000 residents

### Stock Market Analysis & Research Report | R, LaTeX

- Built a Bayesian inference model on historical stock data to identify high-return sectors, delivering a structured report with confidence intervals, posteriors, and sector rankings

## EXTRACURRICULAR ACTIVITIES

---

### Big Data & Analytics Club | The Ohio State University

*Aug 2023 – May 2026*

- Engaged in workshops, speaker events, and hackathons focused on real-world data analytics applications and industry trends

### Lion Dance Leader | The Ohio State University

*Aug 2024 – May 2026*

- Led weekly practices and coordinated performances for 6+ team members, demonstrating leadership and cross-cultural communication
